

Medviso at Euro SCMR

Medviso will attend Euro SCMR 14th Annual Scientific Sessions in Florence, Italy in May 12-14 2016.

Personal meeting

If you are attending the Euro SCMR meeting and are interested in a personal meeting, we are happy to book a meeting with you at the conference. Please respond to this email or send email to [Einar Heiberg](mailto:Einar.Heiberg@medviso.com) and we will find a suitable time for a meeting. We can present new features in Segment CMR, answer potential questions and help you to improve your workflow. At interest, we can also present our new Strain analysis and Feature tracking module in Segment CMR.

Strain analysis and Feature tracking

A complete Strain analysis module is now available in Segment CMR. The module enables Strain analysis from both MR Tagging images and from MR Cine image, and analyzes both short-axis and long-axis image stacks. The module is an additional module to Segment or Segment CMR, and provided for both clinical usage as well as research. Please let us know if you are interested in testing the module by email [sales](mailto:sales@medviso.com).

Segment Newsletter

You are receiving this newsletter since you are registered as a user of the clinical image analysis software Segment CMR provided by Medviso AB. If you do not want to receive further newsletters please use the link below to unsubscribe. If you have a colleague who also would like to get this newsletter, forward it and notify me by reply to this email.

Best regards

Helen Fransson, CEO Medviso AB
