Medviso at SCMR

Medviso will be represented at SCMR 19th Annual Scientific Sessions in Los Angeles in January 27-30 2016.

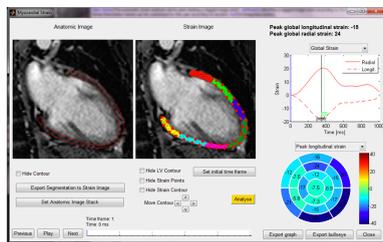

Meet with us

If you are attending the SCMR meeting and are interested in a personal meeting, we are happy to book a meeting with you at the conference. Please respond to this email or send email to Einar Heiberg and we will find a suitable time for a meeting. We can present new features in Segment CMR, answer potential questions and help you to improve your workflow. At interest, we can also present our new software Segment CT and the new Strain analysis and Feature tracking module in Segment CMR.

In the pipeline

Upcoming news from Medviso is a complete Strain module in Segment CMR and the new software product Segment CT. Please let us know if you are interested in testing any of the products by email sales.

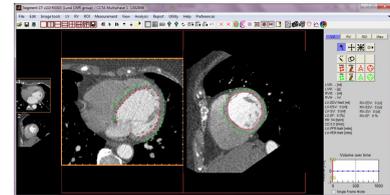

Strain analysis and Feature tracking

A complete Strain module in Segment CMR is to be released in the coming weeks. The module enables Strain analysis from both MR Tagging images as MR Cine image, and analyzes both short-axis and long-axis image stacks. The module will be an additional module to Segment or Segment CMR and provided for both clinical usage as well as research.

Segment CT

Segment CT will be the image analysis solution for clinical cardiac CT. The product is currently on beta testing and will be released in the spring 2016.

Segment Newsletter

You are receiving this newsletter since you are registered as a user of the clinical image analysis software Segment CMR provided by Medviso AB. If you do not want to receive further newsletters please use the link below to unsubscribe. If you have a colleague who also would like to get this newsletter, forward it and notify me by reply to this email.

Best regards
