

Dear Segment User

You are receiving this newsletter since you are registered as a user of the medical image analysis software Segment. The software Segment is brought to you by Medviso AB in close collaboration with Lund Cardiac MR Group, Lund University, Sweden and Region of Scania, Skåne University Hospital. Segment is freely available for research purposes provided that you properly reference the software. If you do not want to receive further newsletters, please see below for how to unsubscribe.

We at Medviso are happy to present interesting news for the autumn. The biggest news is the release of a Strain tagging module in Segment! Furthermore you now find a new ECV module, and new 3D measurement tool in Segment.

Strain Tagging Module

We are happy to present a new module for strain tagging analysis in Segment. The module has been developed in close collaboration with researchers at KU Leuven in Belgium.

The module will be provided as an additional module to Segment, for both clinical usage as well as research.

Please see homepage (<http://medviso.com/products/strain-tagging/>) for more information about the module and contact sales@medviso.com if you are interested in an evaluation and a quote of the module.

New ECV Module

A new ECV analysis module is now available in Segment. With the tool you can quantify ECV values in a set of T1 maps by only few steps of LV and ROI definitions.

3D Measurements

The measurement tool in Segment is updated and it is now possible to perform measurements in 3D. This feature goes nicely together with the new orthogonal view available in Segment. The view is found in the icon menu just to the left of the zoom tools.

Upgrade

To access the latest analysis algorithms, just download the latest version of Segment by go to the download homepage (<http://medviso.com/download2/>).

Interested in Our Premium Academic Support?

To further assist users like you in reaching your research goals, we are pleased to offer Premium Academic Support contracts for 800 EUR/year. This includes priority support by e-mail, telephone or video conference, development of new analysis tools or features such as customized export of data for specific research projects.

Interested in Our Clinical Software Segment CMR?

Please support us in the commitment to keep Segment freely available for research by recommending the commercial software Segment CMR to your clinical colleagues. Please contact sales@medviso.com if you are interested in a 3-month evaluation license or to request a quote for Segment CMR. Clinical sites with Segment CMR also get premium research support and assistance research tool integration into clinical routine.

In the Pipeline

Upcoming news from Medviso is the completely new software product Segment CT. The product will be released at the end of this year. Segment CT will be the image analysis solution for clinical cardiac CT.

Support

Most importantly, we love bug reports! Feedback and bug reports from users like you are essential to help us to develop and continuously improve the software. We also welcome suggestions for improvements. Please send email to support@medviso.com to get in contact with us.

Referencing to Segment

We like to remind you that the conditions for using Segment freely for research purposes, is that you need to properly reference Segment and relevant articles in your papers. Proper referencing is necessary to secure future funding for keeping a freely available version of Segment for academic purposes. Find details of how to properly reference to Segment at <http://medviso.com/research/how-to-refer/>.

Best regards

Helen Fransson, CEO Medviso AB
